

DL40-R92A

Small, adjustable downlight with a big attitude

Description

DL40 is the ideal choice when you want to use the lighting to create a warm and luxurious atmosphere. The low profile and compact design also simplify installation and reduces the need for space above ceiling. When aesthetics matter DL40 has a light but robust aluminium housing, which is available in three different finishes: white, chrome and brass. The ability to produce decorative illumination combined with the clean, elegant design, makes DL40 ideal for applications such as public areas, cabins and passenger areas on cruise ships.

Technical specifications

Design

According to marine requirements
