

# Flashing light

High intensity flashing lights

## Description

Flashing lights are designed in different colours for all general warning purposes e.g. "Huge Vessel Light" or "Dangerous Cargo Light". The Flashing lights fulfil all requirements of IMO Anti Collision Regulations and local rules.

The high intensity Flashing lights with their special plastic housing come with several flash rates. You can choose between 60, 120 or 180 flashes per minute.

## Technical specifications
